

Bird Feeder Digital Download

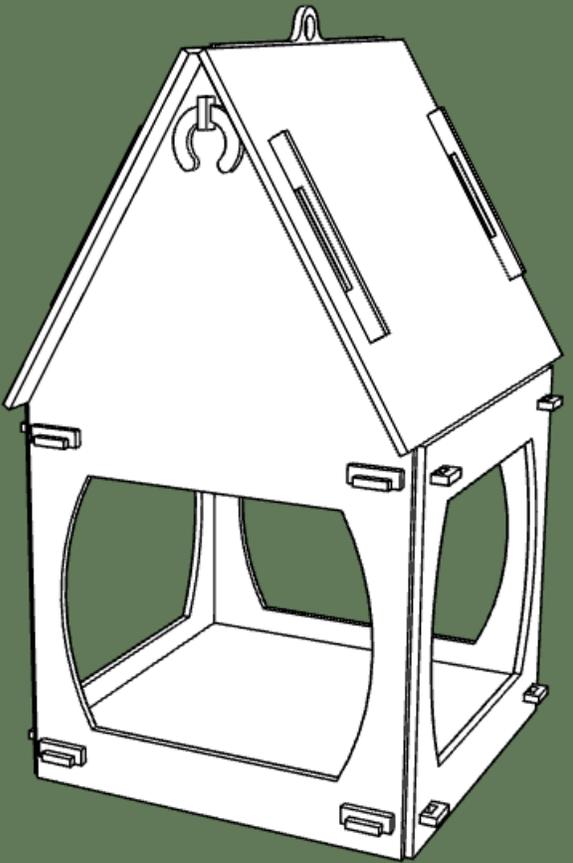

Brought to you by the Three Toed Bear

THREETOEDBEAR

CUSTOMIZE YOUR LIFE

The Bird House

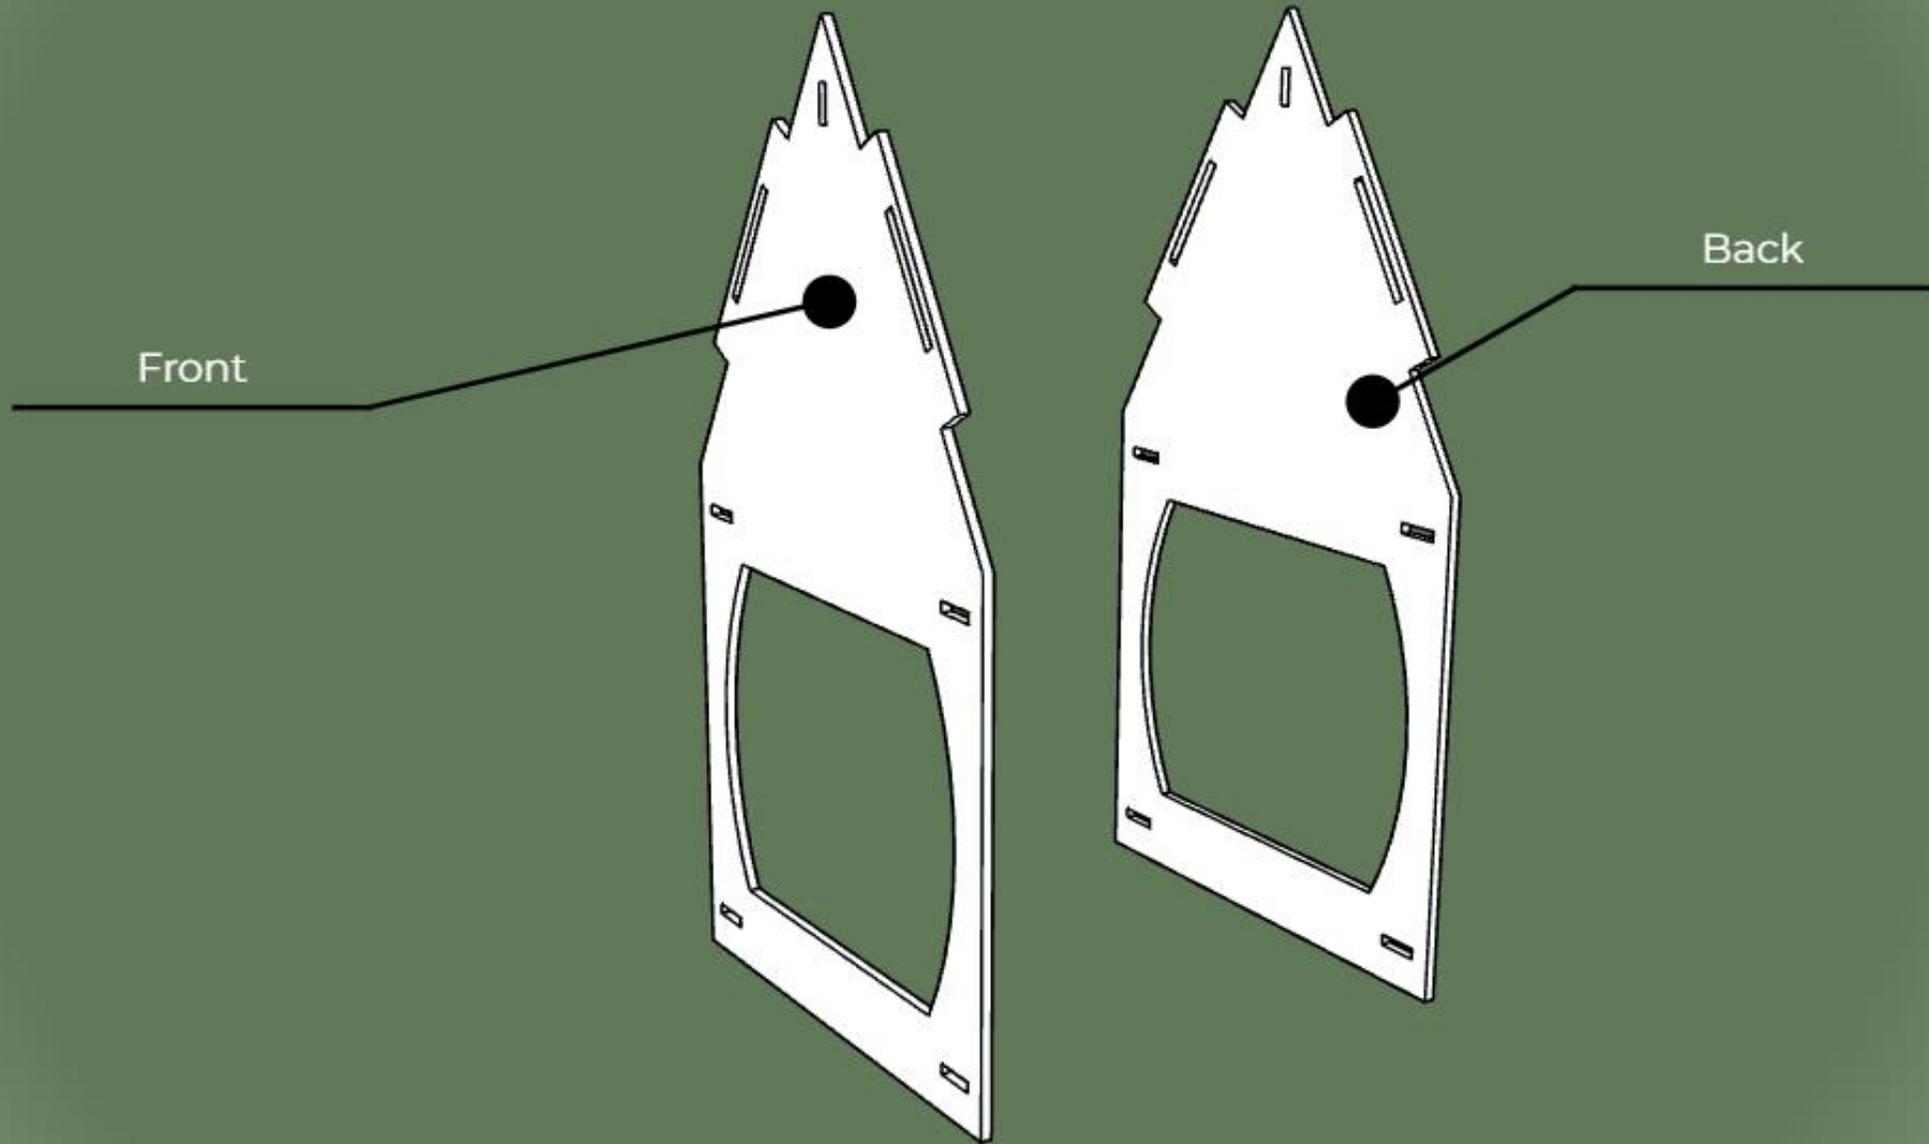

Thank you so much for your purchase and your interest in my designs. If you get the chance, pop on over to www.threetoedbear.com where there are lots of free downloads and some discount links for some others. Be sure to subscribe to the mailing list and be the first notified of new free designs, or when popular designs end up going online for free as a thank you to my customers!

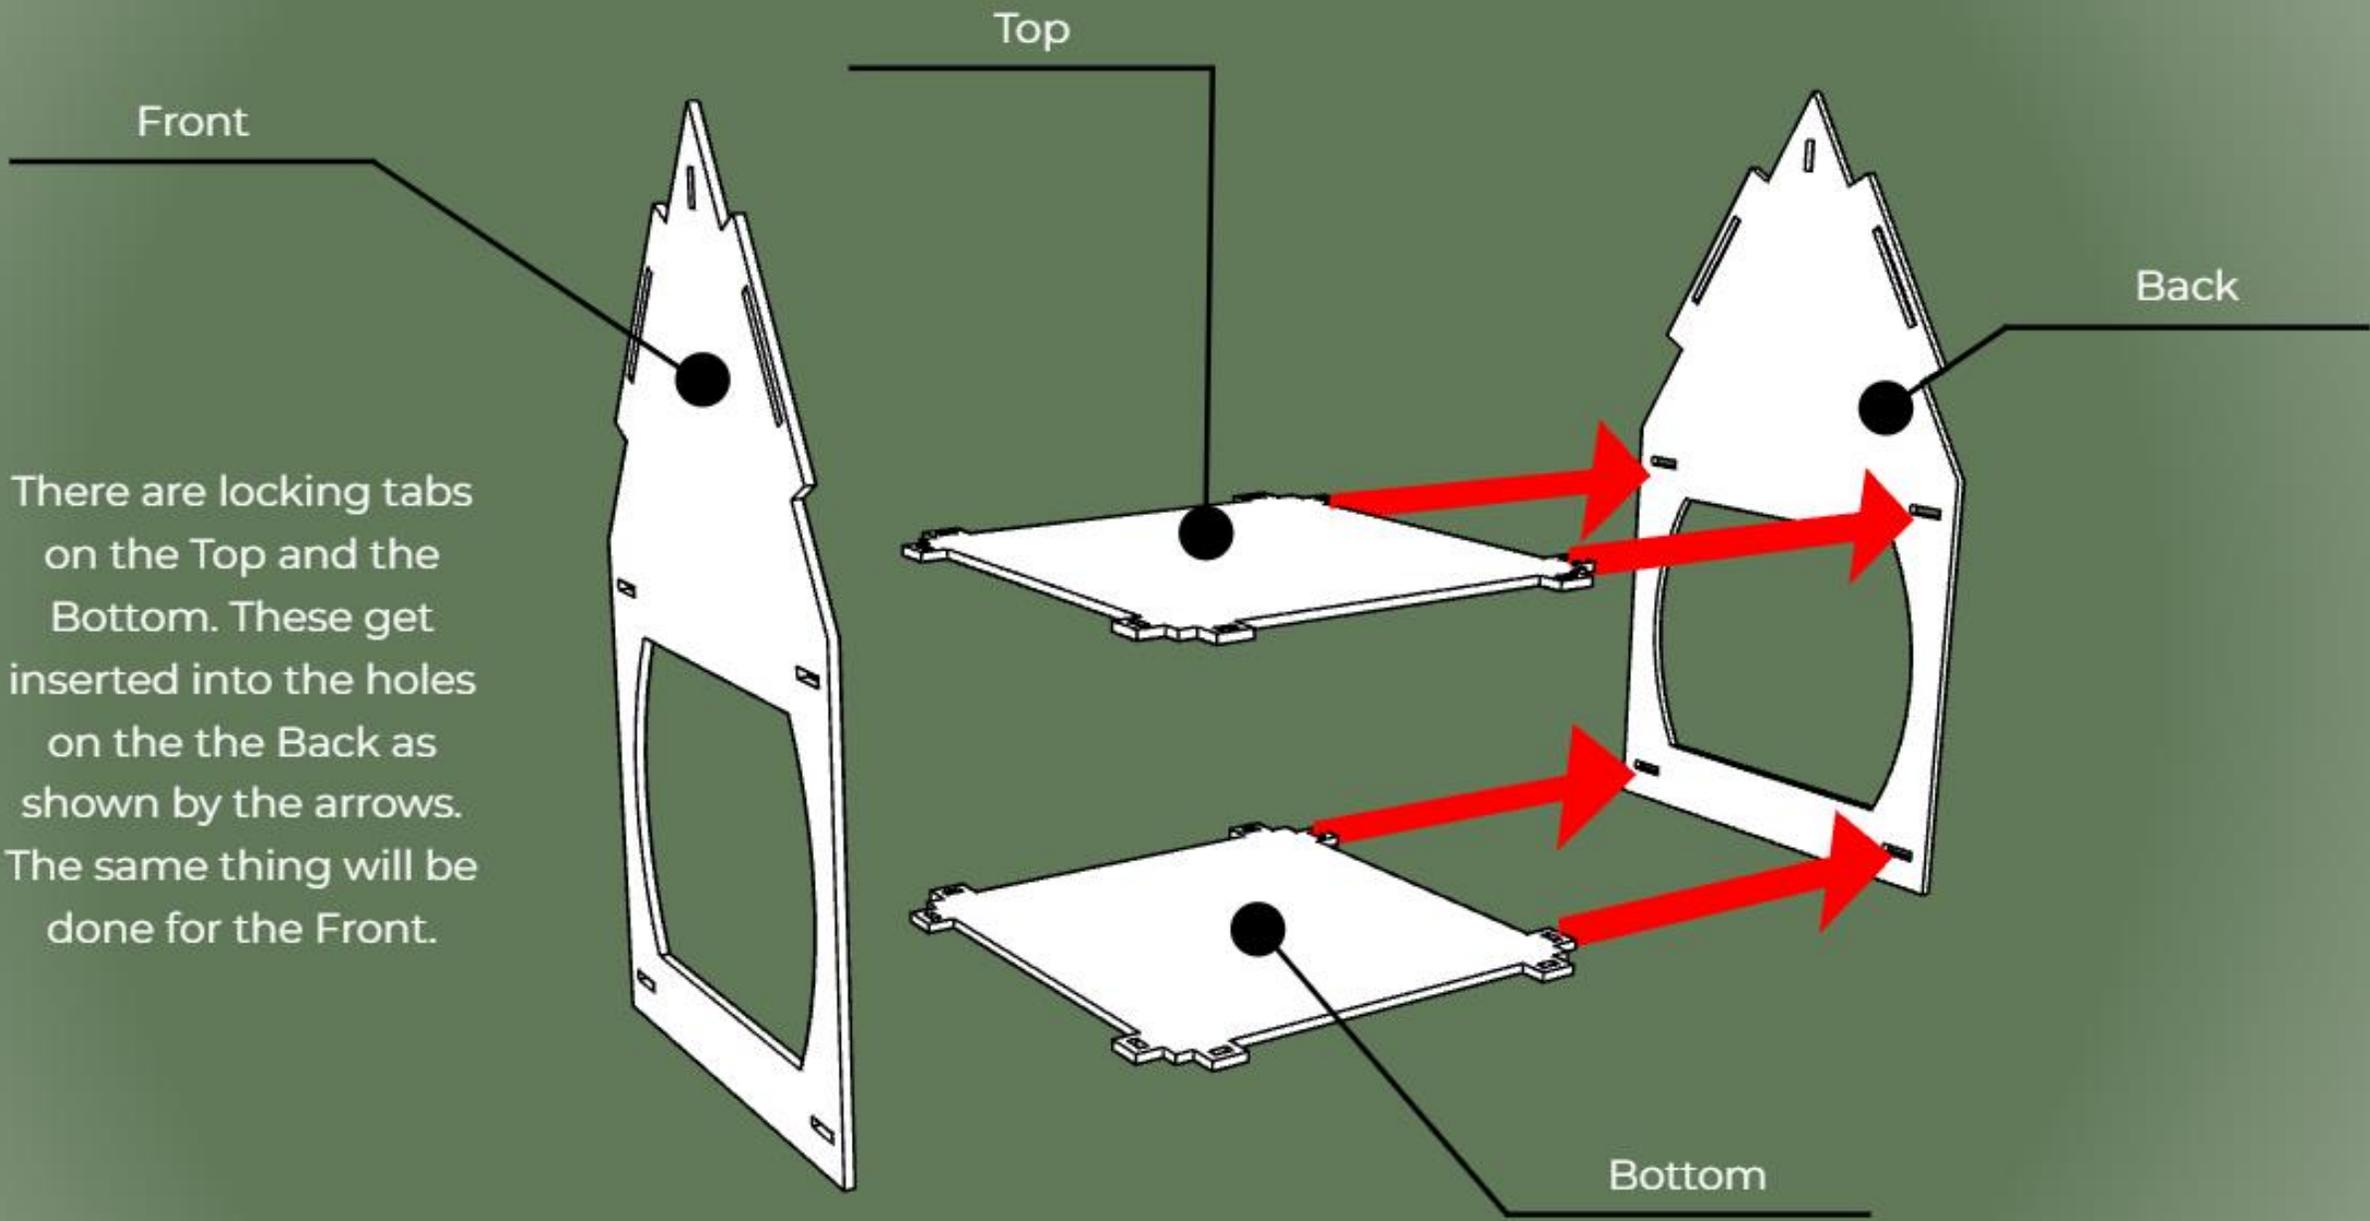

You can also get notified of all the free files available on Facebook in the Glowforge Creators group at <https://www.facebook.com/groups/303245694844372>

And of course check me out on Instagram @threetoedbear
<https://www.instagram.com/threetoedbear/>

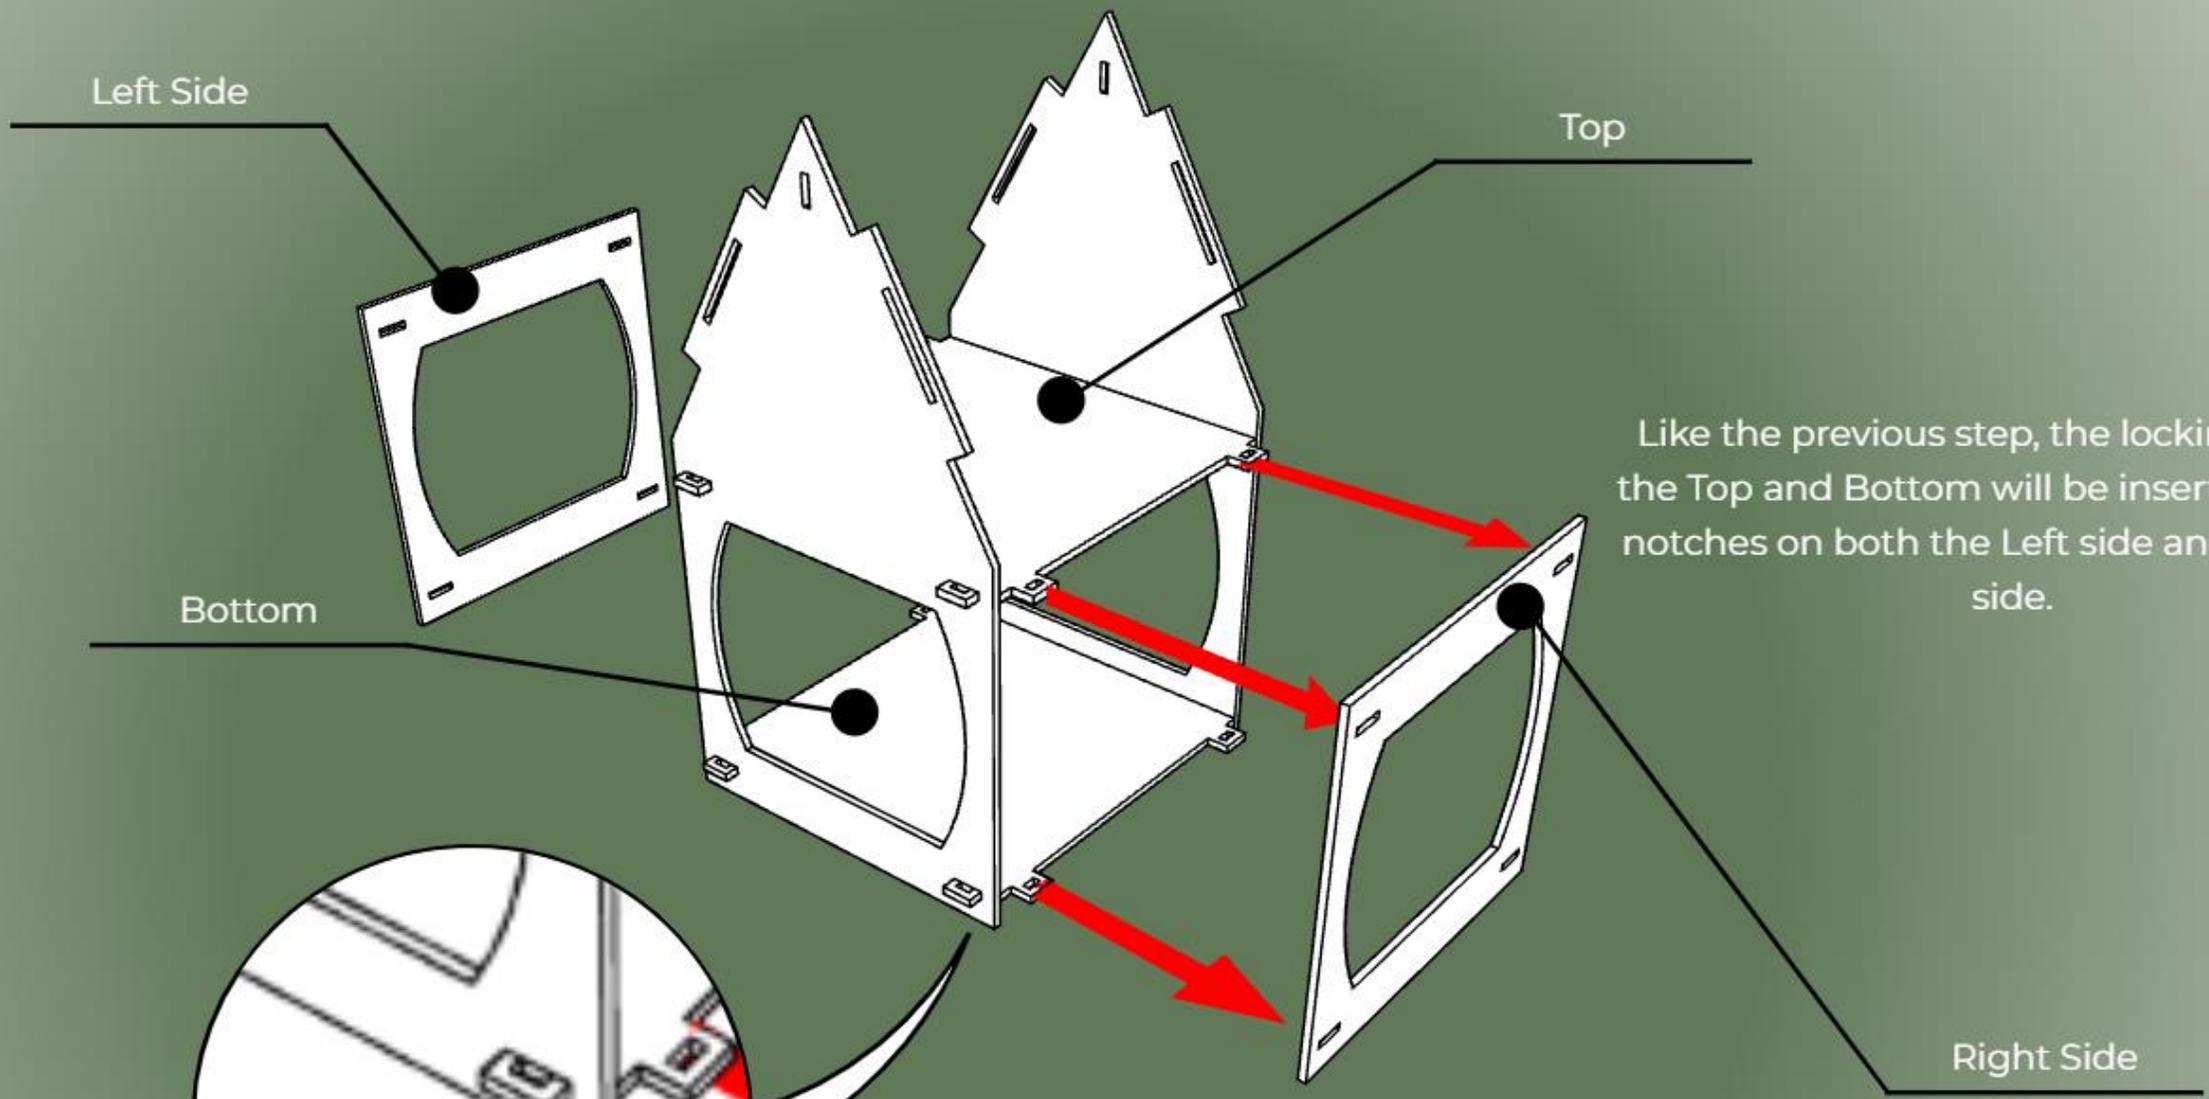

Please test the notch and groove fits before cutting the entire assembly. Not all lasers or materials are created the same, so getting a kerf-fit that works for everyone is impossible. This will work the material I recommend on www.threetoedbear.com

If the fits don't work for you, please feel free to shoot me an email at threetoedbear@gmail.com and we can work together to get you an assembly with the proper fits.

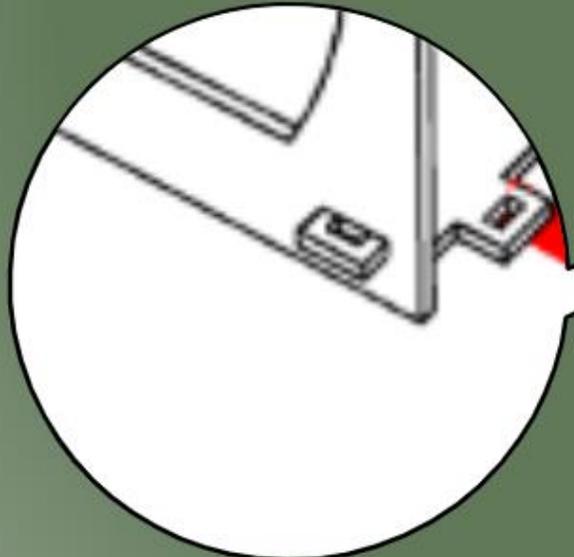

There are locking tabs on the Top and the Bottom. These get inserted into the holes on the the Back as shown by the arrows. The same thing will be done for the Front.

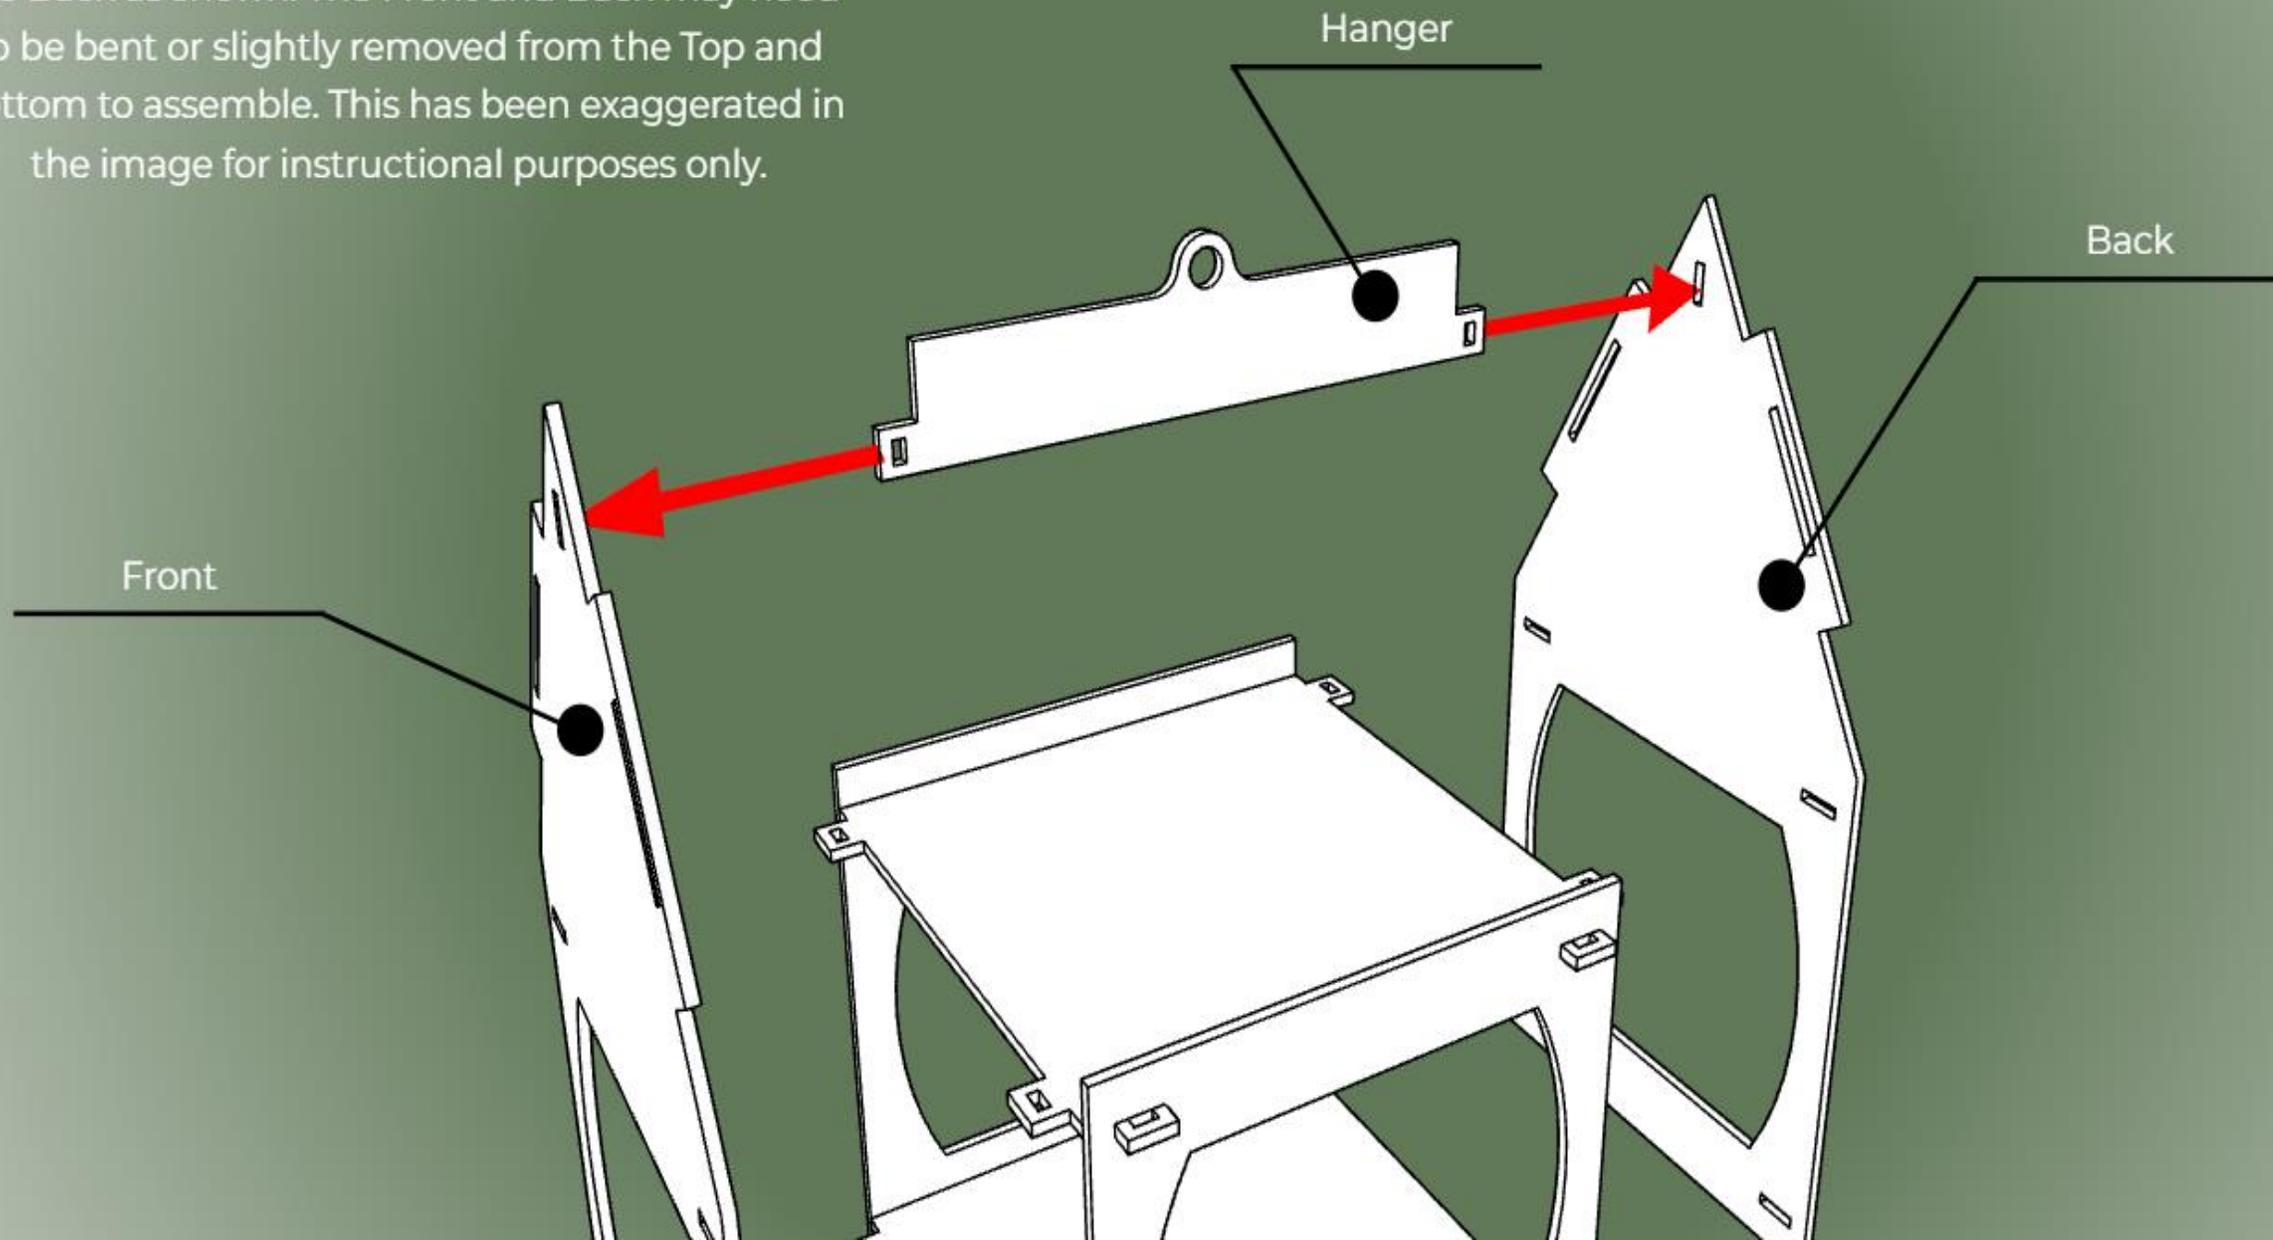

Like the previous step, the locking tabs on the Top and Bottom will be inserted into the notches on both the Left side and the Right side.

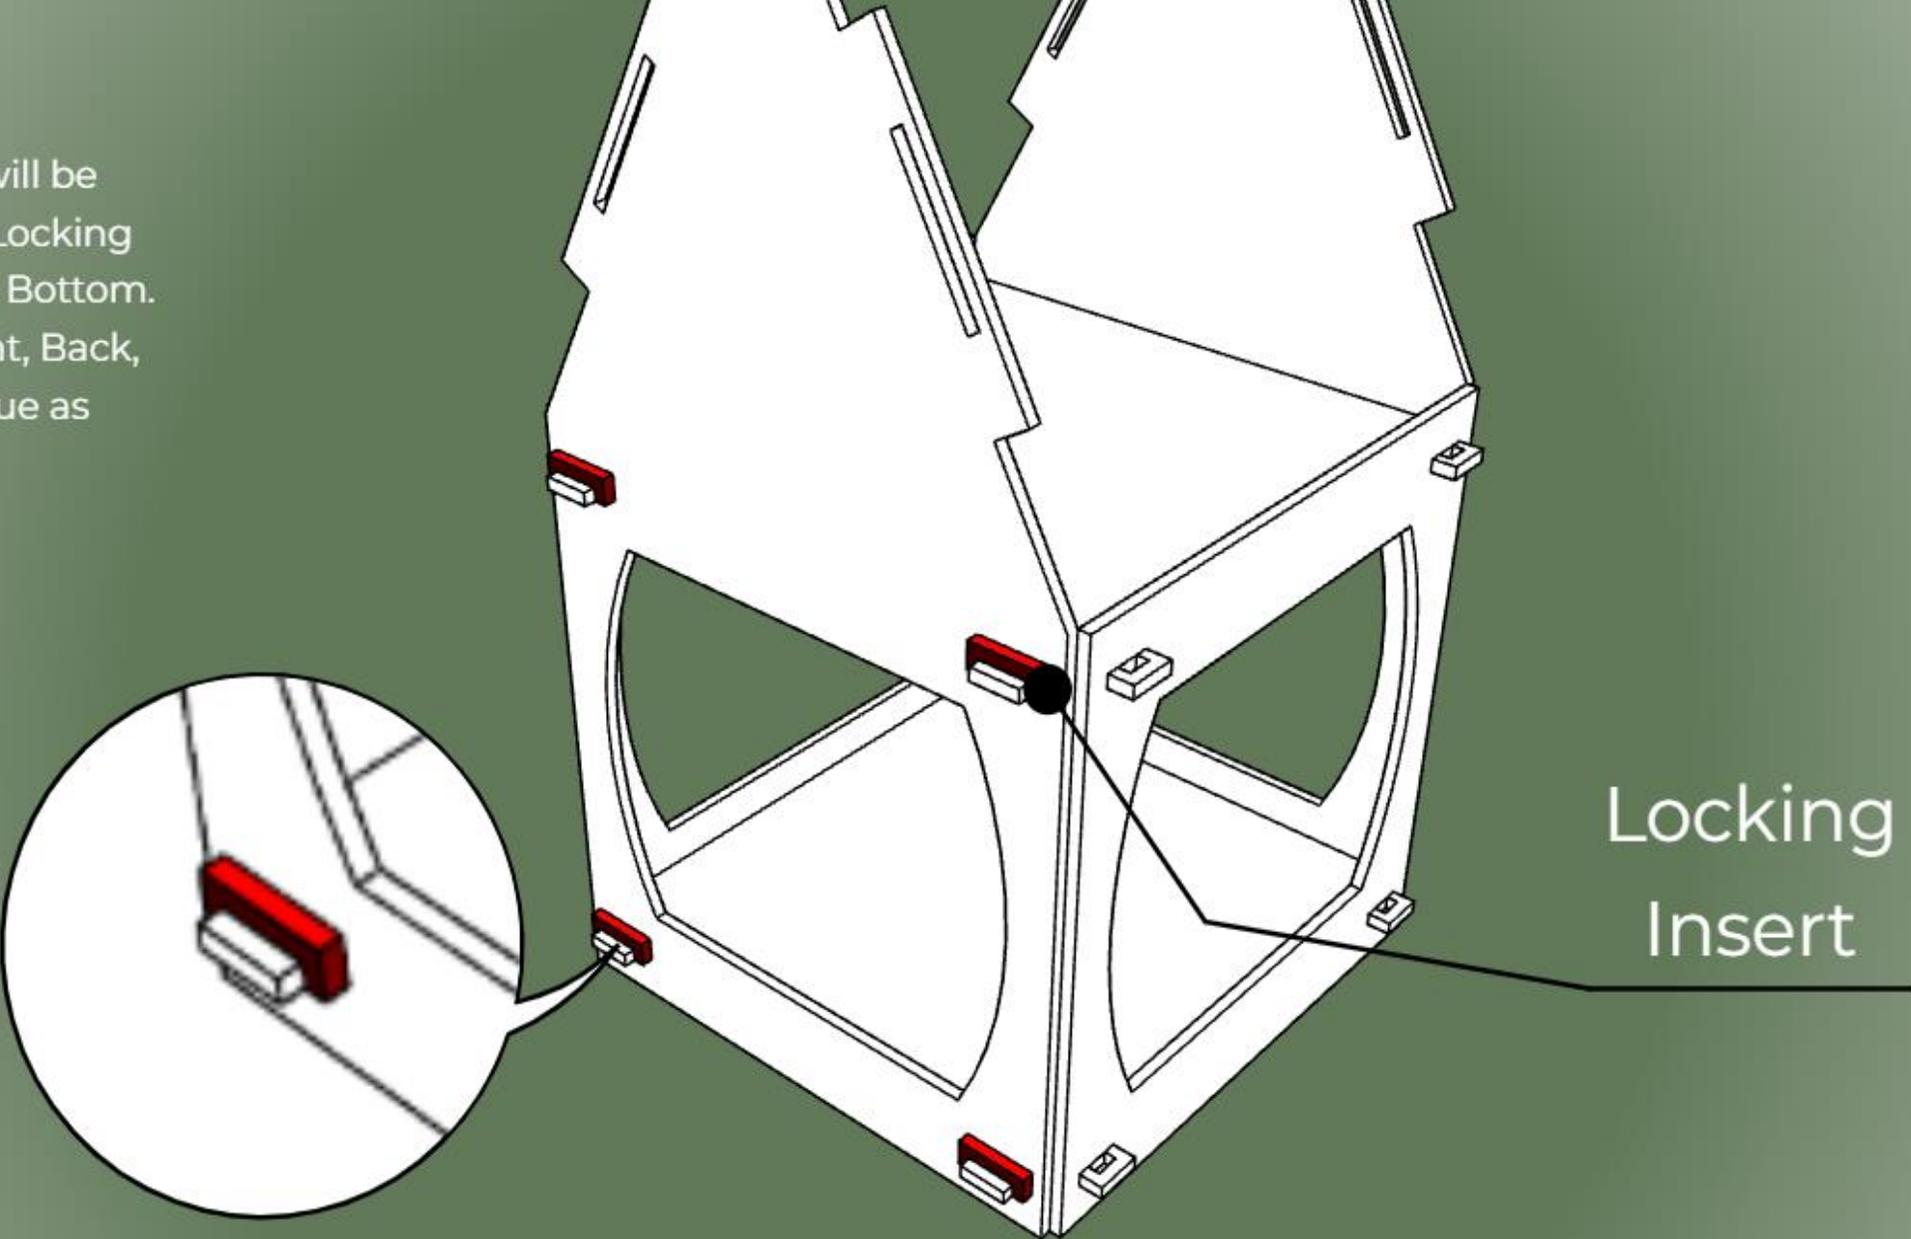

This is what the locking tabs look like when inserted into the front, back, and sides.

The Hanger needs to be inserted into the Front and the Back as shown. The Front and Back may need to be bent or slightly removed from the Top and Bottom to assemble. This has been exaggerated in the image for instructional purposes only.

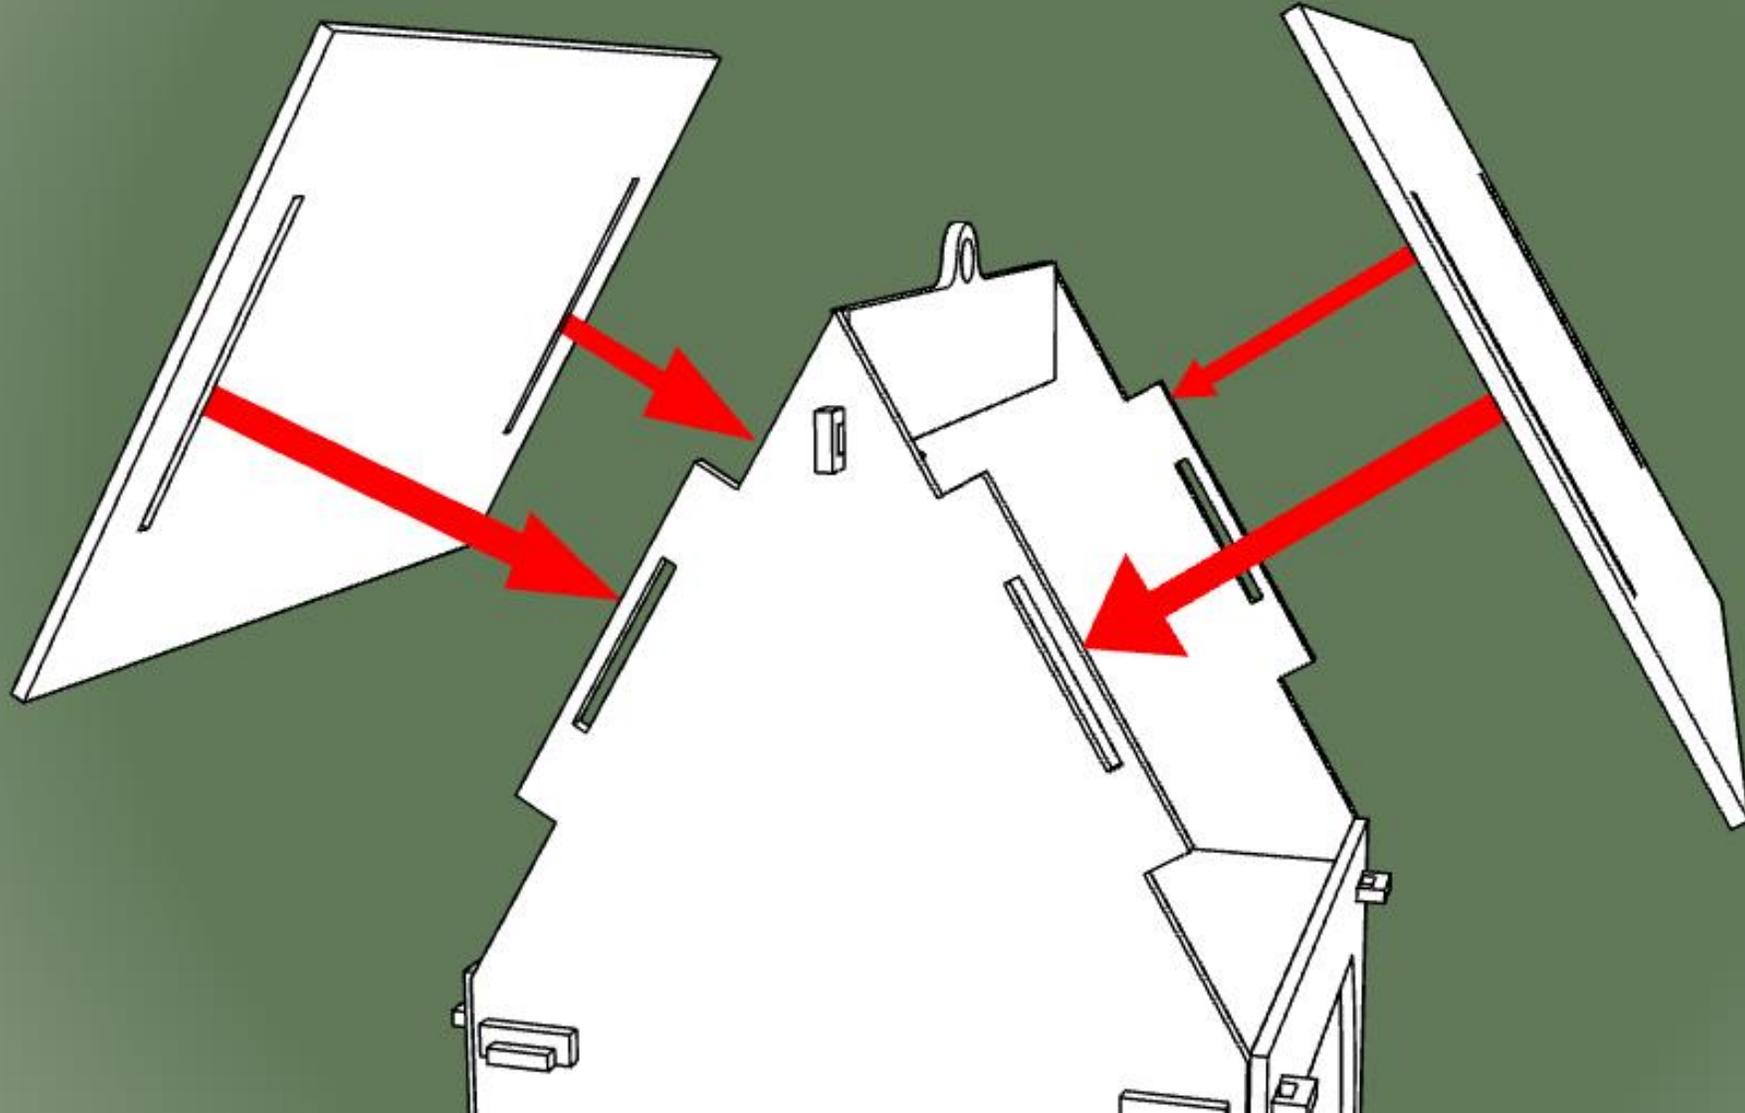

The Locking Inserts will be inserted into all of the Locking Tabs on the Top and the Bottom. These will hold the Front, Back, and Sides on. Add glue as needed.

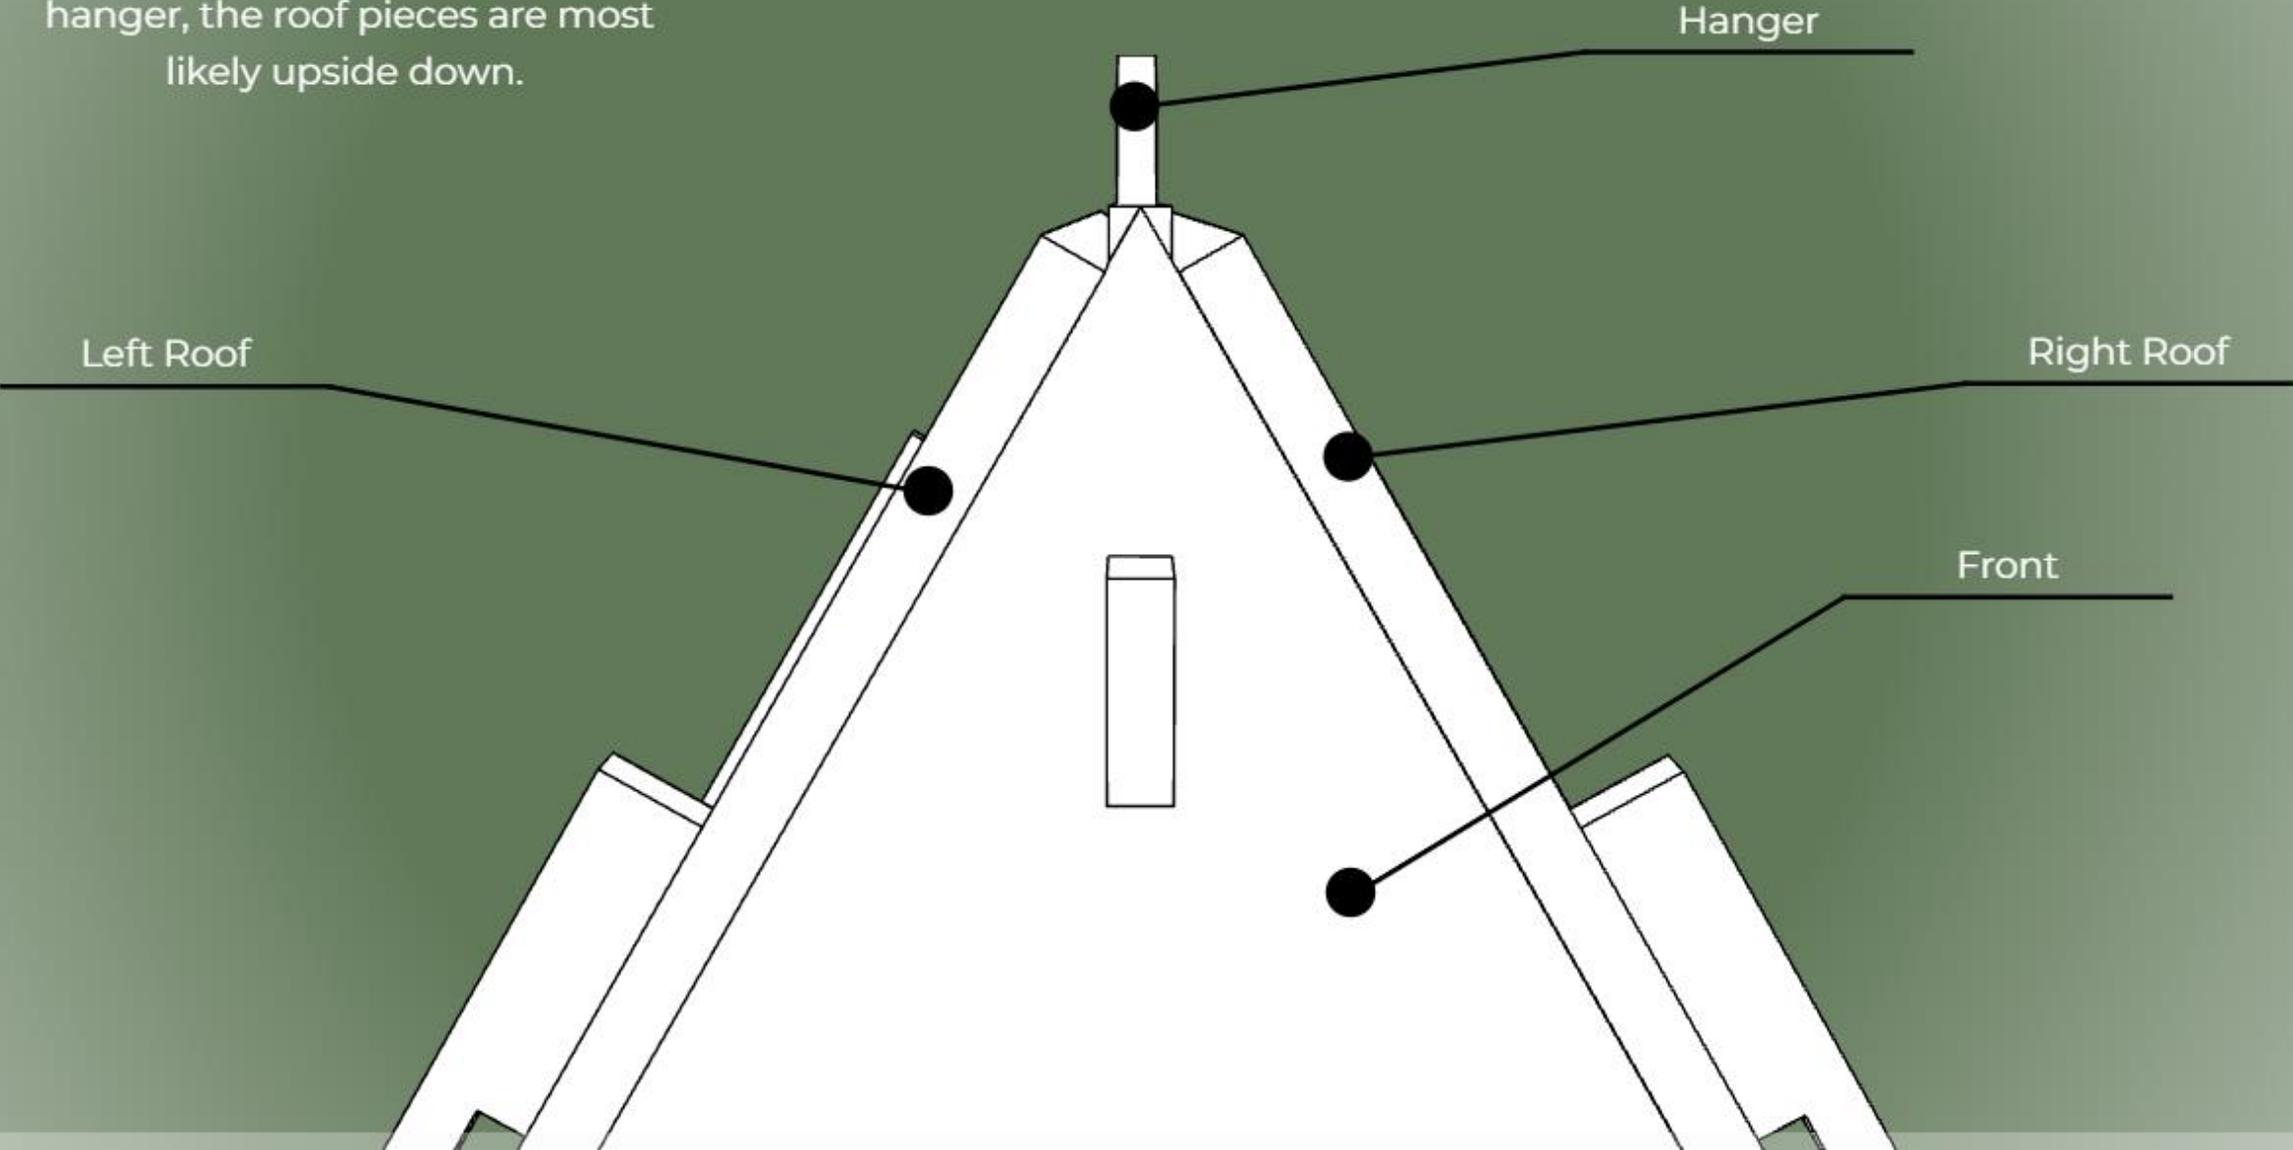

Locking
Insert

Insert the Left and Right Roof onto the Locking Tabs on the Front and the Back. Double check the orientation of the Roof Pieces. The bottom side of the roof piece is slightly longer than top side.

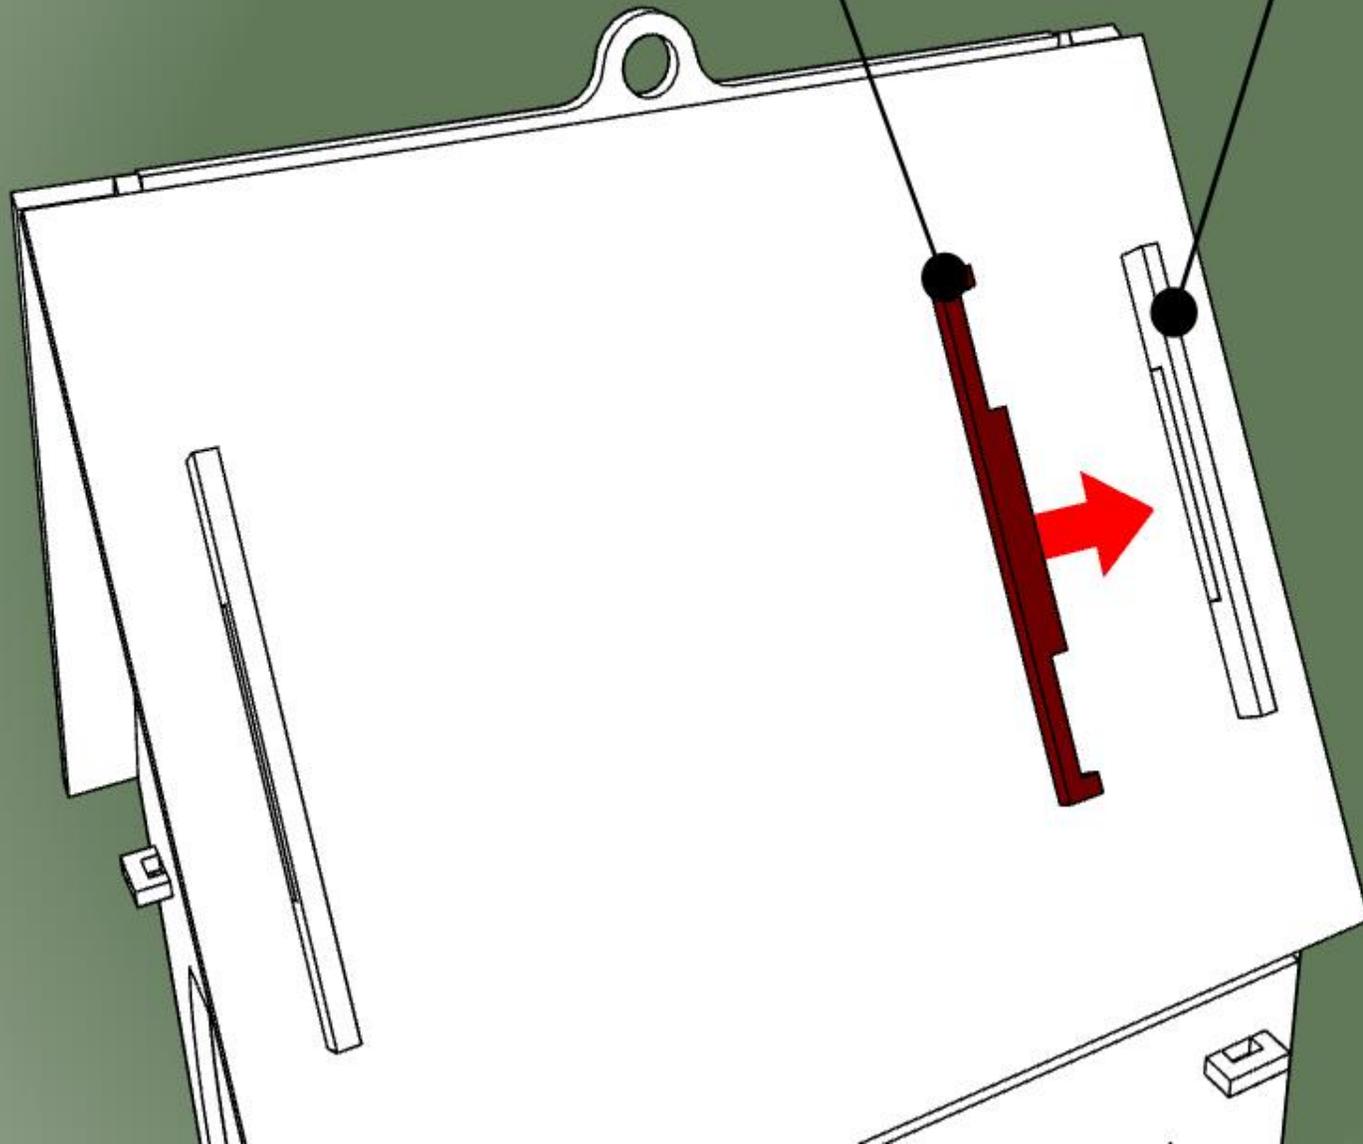

The Roof pieces align as a very tight fit with the hanger. If there is any bend in the Roof pieces against the hanger, the roof pieces are most likely upside down.

Roof Locking
Insert

Roof Locking
Tab

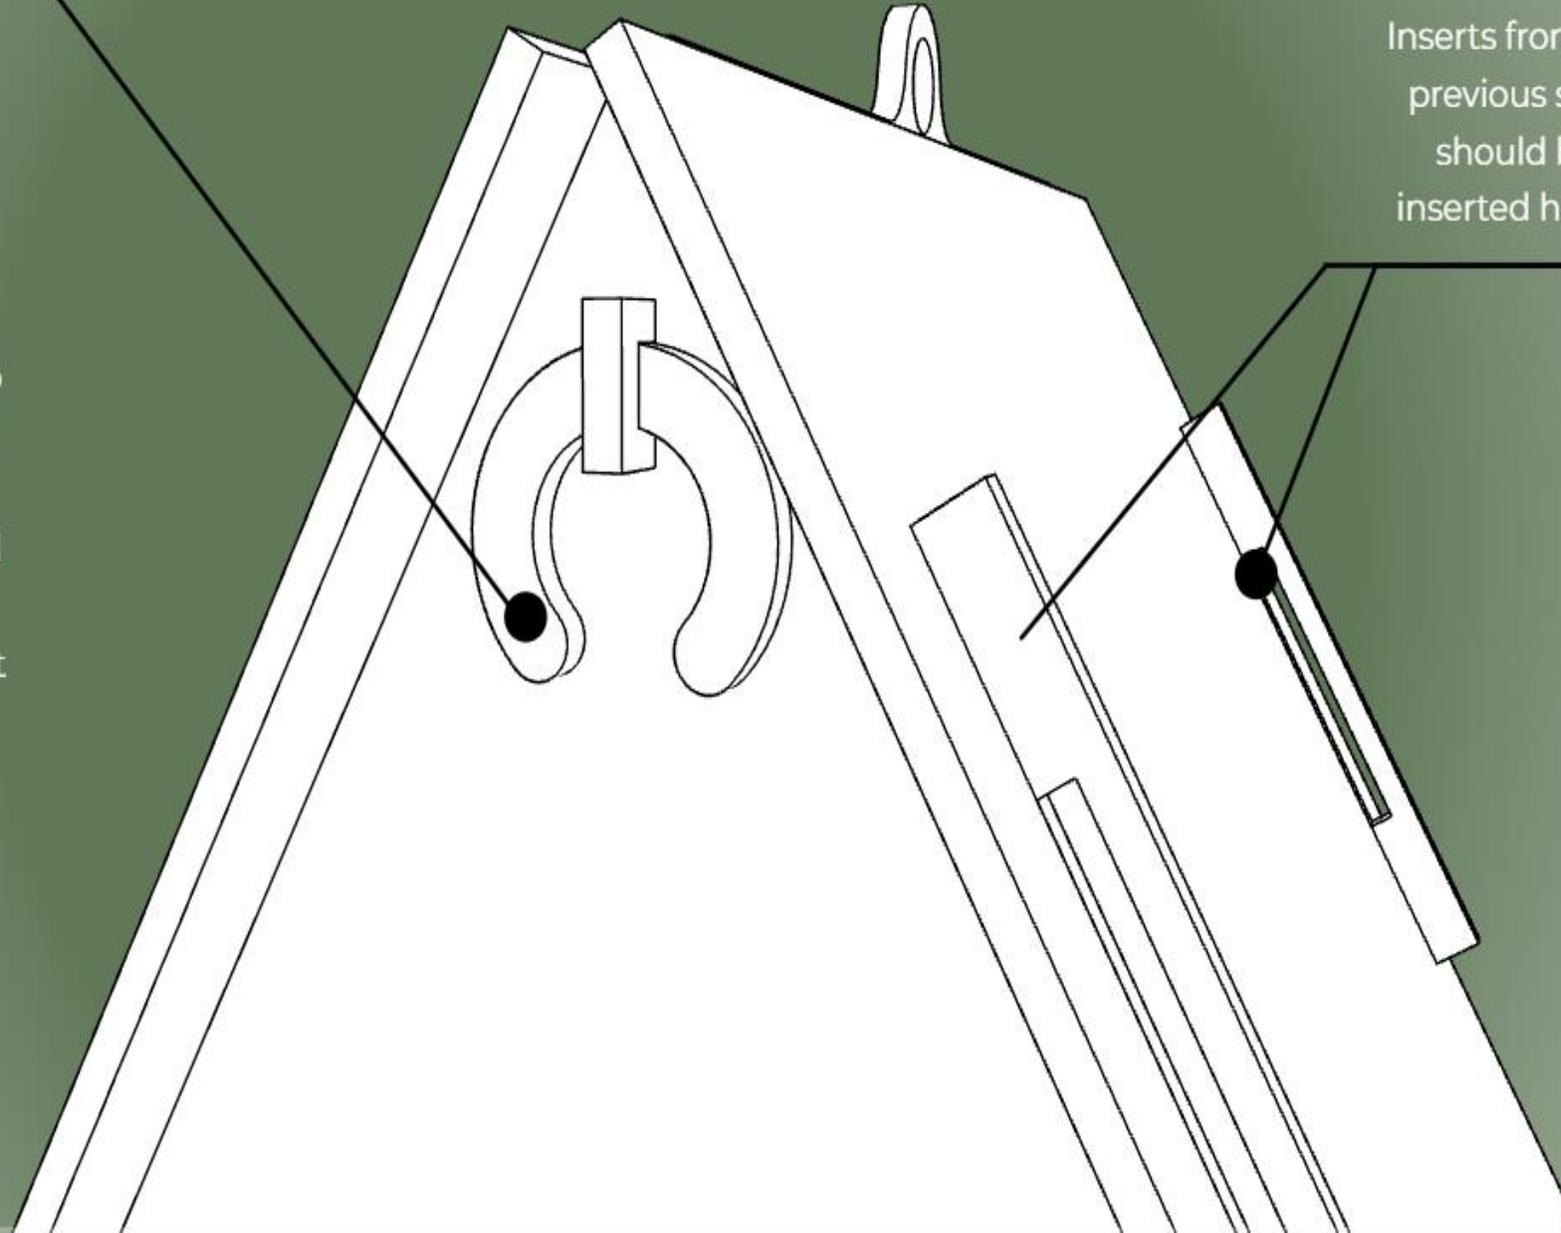

Insert the Roof Locking Insert into the locking tabs on the Front and the Back. There should be 4 Roof Locking Inserts used in total. Glue them in place if necessary.

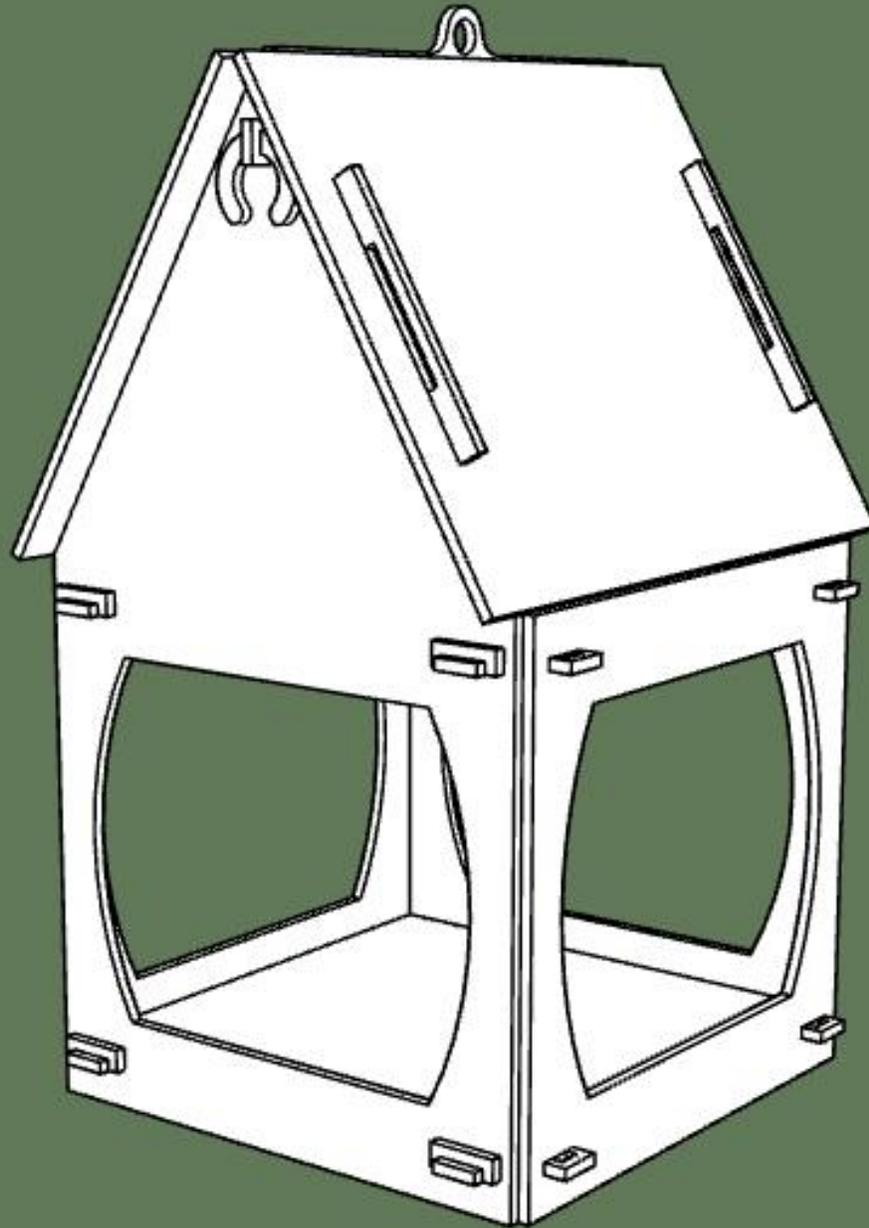

Circular Holder

Roof Locking
Inserts from the
previous step
should be
inserted here.

The Circular Holder gets
inserted into the Locking Tab
from the Hanger. Insert one
end into the opening in the
locking tab and rotate it until
you get the desired look.
Repeat this for both the Front
and the Back.

Enjoy!

Send pictures or
your birdhouses
and birds!
